Familienbüro (family office)

Service and contact point
for parents and families

Childcare • Education • Leisure • Culture • Sport

Familienbüros

You want to ask about

... services available during pregnancy?

... finding and registering for child day-care places?

... personal concerns in all areas relating to "family"?

... sports courses and cultural activities for your children?

... availability of financial support?

... availability of support for language development, motor skills or other matters?

Our staff can/will

- inform you of the support services available right from the start of pregnancy,
- carry out welcome visits to all parents of first-born children, and in some cases also for further births,
- inform you about childcare offers in day-care centres and other child day care arrangements and help you with the registration process,
- support you in the search for suitable leisure, cultural and sports activities,
- offer early childhood education measures to promote language development, motor skills and nutrition,
- provide information on the recommended child screening examinations ("U" examinations),
- help with other personal concerns and advise you individually.

If so, the Family Office is the right place for you!

There are Family Offices situated in all parts of the city – each one ready and able to provide all relevant information needed for your residential location.
