

LoyalGo

- LoyalGo is developing the modular Smart City Station (SCS). The SCS allows setting up common smart city sensors, multimodal charging infrastructure, street lighting and digital or analog advertising displays.
- Out of home advertising companies benefit from the possibility of adding charging infrastructure in order to support a sustainable mobility and receive governmental subsidies.
- Cities which need to set up charging infrastructure benefit from additional values such as sensors to track the frequency of passerbies or monitoring the parking lots in front of the charging station
- Benefit from 6 experience in the field of e-mobility and smart cities. We will be happy to assist you in finding the perfect solution for you.
